Niharika Suru — Product Designer

Vishakapatnam, Andhra Pradesh

Profile Summary

Product Designer with 3 years of experience designing customer-centered web and mobile experiences across enterprise platforms, CRM systems, and productivity applications. Skilled in user research, interaction design, prototyping, accessibility, and design systems. Experienced in translating business requirements into intuitive user journeys and collaborating with cross-functional teams to deliver measurable business impact. Passionate about leveraging AI-assisted design workflows and human-centered design principles to solve complex user problems.

Skills

Design Tools: Figma, Adobe XD, Balsamiq

UX Research & Strategy: User Research, Stakeholder Interviews, Persona Development, Customer Journey Mapping, Journey Mapping, Information Architecture, Human-Centered Design, Design Thinking, Heuristic Evaluation

UX Design: Wireframing, User Flows, Interaction Flows, Prototyping, Interaction Design, Design Systems, Micro-interactions, Responsive Design, Accessibility (WCAG 2.1)

Testing & Optimization: Usability Testing, A/B Testing, Data-Informed Design

AI for UX: ChatGPT, Claude, Figma AI, UX Magic, Generative AI for UX, Conversational UX

Front end: HTML, CSS, SASS, Angular, React, Next JS, TypeScript, JavaScript, Bootstrap, Tailwind, PrimeNG, Material UI, Shad CN.

Experience

UI/UX Designer | Amzur Technologies Private Limited

June, 2023 - Present | Visakhapatnam

Official Title: Junior Software Engineer

- Collaborated with product managers, business analysts, and engineers to translate business requirements into user-centered design solutions, reducing design-to-development gaps and improving delivery efficiency.
- Conducted stakeholder discussions and incorporated customer feedback to identify pain points, informing end-to-end user experience improvements.
- Designed responsive enterprise web experiences and translated complex requirements into interaction flows, wireframes, user journeys, high-fidelity mockups, and interactive prototypes.
- Created intuitive interaction patterns and micro-interactions while balancing user needs, business goals, and technical constraints.
- Applied WCAG accessibility principles and usability best practices to improve readability, navigation, and inclusive user experiences across web applications.
- Leveraged Generative AI tools including ChatGPT, Claude, and Figma AI to accelerate ideation, workflow exploration, and rapid prototyping.
- Presented design concepts, research insights, and prototype solutions to stakeholders, effectively communicating design decisions and aligning teams on product direction.

Projects

Genesis CRM & Pilot System (GPS)

CRM Application for Real Estate Domain | Agile Environment

- Led end-to-end UI/UX design for a real estate CRM platform, improving workflow efficiency across multiple business modules.
- Gathered requirements through stakeholder workshops and user feedback sessions to identify workflow bottlenecks, prioritize improvements, and validate solutions through iterative usability reviews.
- Developed interaction flows, user journeys, wireframes, and interaction patterns, reducing user navigation time by 25% across key workflows.
- Improved consistency across legacy and new modules, reducing user confusion and support requests by 20%.
- Collaborated with Business Analysts, QA, and developers to refine user journeys, reduce implementation gaps by 30%, and ensure sprint-ready delivery while applying WCAG accessibility standards, enhancing readability and usability for a wider range of users.

Adobe to Figma Migration

UI/UX Designer | Design Systems Contributor

- Led the migration of product design assets from Adobe XD to Figma, ensuring design consistency across all existing product modules.
- Established scalable design system governance, reusable component libraries, and shared templates, improving team productivity by 35%.
- Standardized typography, spacing, color systems, and accessibility practices, reducing UI inconsistencies by 40%.
- Improved developer handoff efficiency and cross-functional collaboration, reducing design-related rework by 30% and accelerating design-to-development turnaround by 25%.

Revup

Product Designer | Lead Management & Productivity Web Application

- Conducted workflow analysis and journey mapping to identify inefficiencies in lead management processes and prioritize user needs.
- Redesigned lead management workflows and created interactive prototypes, improving task clarity and increasing user efficiency by 20%.
- Collaborated with stakeholders to validate design solutions and ensure alignment between business goals and user requirements.
- Designed multi-user interfaces for communication, scheduling, and collaboration, reducing task completion time by 15%.
- Leveraged AI-assisted design workflows and reusable UI patterns to accelerate iteration cycles by 30% while improving design consistency.

F2MX – Mobile Designer

Mobile Product Designer | Fantasy Sports Trading Platform

- Conducted competitive analysis and user behavior reviews to identify opportunities for improving onboarding and engagement experiences.
- Designed a mobile-first fantasy sports trading platform, improving interaction clarity across complex, data-heavy workflows.
- Defined end-to-end user journeys and mobile interaction patterns for end users and administrators, reducing onboarding friction by 20%.
- Applied rapid prototyping and AI-assisted design workflows, reducing design iteration cycles by 30%.
- Optimized performance-driven mobile experiences, improving user retention, session engagement, and decision-making efficiency.

Education

Vignan Institute of Information Technology

August 2020 - May 2023 | Visakhapatnam

Bachelor of Technology in Electronics and Communication Engineering , CGPA : 8.6

Sanketika Polytechnic College

July 2017 - April 2020 | Visakhapatnam

Diploma in Electronics and Communication Engineering , Percentage : 90%

Key Achievements

Star Performer | Jan – Mar 2024

Recognized for exceptional performance and valuable contribution to product design and delivery.

Hackathon – ERP Revenue Leakage Analysis

Collaborated on a solution-focused initiative to identify revenue leakage gaps and workflow inefficiencies in ERP systems.

Accelerated Project Delivery Using AI Tools

Applied AI-assisted workflows to accelerate project execution, improve iteration speed, and meet demanding timelines.
